### 1 Group Structure

The Bank operates under a retail banking license granted by the Central Bank of Bahrain (“CBB”) on 20 October 2003. The Bank does not have significant operating subsidiaries. The subsidiaries set-up are primarily special purpose entities with nominal capital to execute specific investment transactions. The subsidiaries qualify as commercial entities as per the CBB capital computation guidelines and are risk weighted as investments for capital adequacy purposes.

### 2 Capital Management and Capital Adequacy ratio

#### 2.1 Capital management

The Bank’s policy is to maintain a strong capital base to develop investor, creditor and market confidence and to sustain the future development of business. ### **6.3 Displaced commercial risk**

Displaced Commercial Risk refers to the market pressure to pay returns that exceeds the rate that has been earned on the assets financed by Unrestricted Investment Accounts. This can be due to the return on such assets being lower than that of competitors. The Bank undertakes quarterly review of its assets and liabilities portfolios to identify, monitor and address potential risks that may arise from such mismatch. Please refer to the section on URIA for further details.

### **6.4 Other risks**

Other risks include strategic risk, fiduciary risks, and regulation risks etc. which are inherent in all business and are not easily measurable or quantifiable. The Bank's Board has overall responsibility for approving and reviewing the risk strategies and amendments to the risk policies. The Bank senior management is responsible for implementing the risk strategy approved by the Board. The management also ensures that internal systems of corporate governance and regulatory compliance for management of fiduciary and reputational risks are robust and effective. The Bank also internally allocates additional capital for such risks under its ICAAP.
